

ABSTRACT OF THE DISCLOSURE

There can be obtained a handlebar stem ensuring that a speed indicator provides a readily observable indication and in addition thereto capable of achieving a reduction in size and weight. A handlebar stem
5 attaching a bicycle's handlebar includes a rod attaching the handlebar stem to the bicycle; a speed indicator receiving a signal from a speed sensor to display speed; and an indicator housing located at a front protrusion extending in a forward direction to traverse the rod to house the speed
10 indicator, the indicator housing, as seen along the rod, overlapping or being adjacent to the rod.
